SUMMARY

Technical Project Management professional with 11+ years experience leading customer-facing platform deployments, technical onboarding, and cross-functional execution across cloud infrastructure and AI-adjacent products. Strong track record translating complex technical work into adoption, operational improvements, and stakeholder alignment.

EXPERIENCE

Sr. Technical Project Manager - Cloud Infrastructure
10/2023 - 08/2026

Chameleon Cloud Platform, University of Chicago — Chicago, IL

Lead operations and strategic delivery for a federally funded cloud platform with $14M in active funding, supporting 15,000+ users across 1,300+ accounts and coordinating new feature development for 60+ partners

- Added $2.5M in new funding for AI platform feature by leading an AI-heavy documentation pilot using vector search and RAG (Ollama), expanding platform AI capabilities and contributing to a peer-reviewed publication at top HPC conference.
- Cut customer onboarding cycle time by ~40% by addressing workflow automation and process redesign, improving user orienting and operational efficiency.
- Launched a quarterly webinar series (14+ presented) and monthly newsletter to drive ongoing client AI engagement and platform feature adoption.
- Reduced support requests by +15% and improved platform information accessibility by redesigning documentation and launching customer feedback loops.
- Secured and maintained 5 grants totaling $14M by delivering quarterly executive reviews on site performance and outcomes to funding stakeholders and writing 6 client proposals.
- Aligned technical teams and external clients around delivery milestones and success metrics by building project plans spanning scope, resourcing, timelines, and KPI frameworks.

Technical Project Manager - Edge Computing
10/2021 - 10/2023

FLOTO Platform, UChicago Data Science Institute — Chicago, IL

Directed deployment and operations for an edge platform supporting over a dozen State Broadband Offices, scaling from 0 to 1,000+ devices nationally, building pipelines to process 180M data points while coordinating 40+ partners and managing ~$3M in total project funding

- Procured 1200+ computers needed for launch on a tight timeline ($200K budget), hitting my supply deadlines and coming in under budget despite unforeseen supply shortages.
- Oversaw client engagement for rural and urban broadband assessments. Scoped measurement needs for federal grants. Designed strategy using field engineers as ambassadors, installing 300 devices regionally.
- Delivered validated broadband quality dataset one month ahead of deadline, revealing >50% of measured locations fell below federal thresholds – evidence that secured grant funding for regional fiber deployment and funding revisions totaling $20M.
- Secured $1.5M in additional funding by fostering dozens of multi-institutional partnerships and co-authoring a successful grant proposal to scale infrastructure 5x.

Engagement Manager / Analyst
05/2014 - 03/2019

Criterion Economics — Washington, DC

Led economic analysis for 15+ Fortune 500 clients in major litigation, coordinating across economists, attorneys, and analysts and crafting key testimonies in federal cases ($500M+).

- Delivered favorable outcomes in 24+ cases including Apple v. Qualcomm dispute by engaging clients through the full project lifecycle, from client intake to product delivery.
- Coordinated original analysis, economic modeling, and case strategy; presented findings to client legal teams and adapted analysis to evolving case requirements.
- Contributed original research and analysis to 30+ expert reports and publications used in litigation and business development by engineering and analyzing novel economic datasets.
- Promoted from Analyst (2014-2016) to Senior Analyst (2016-2017) and then to Engagement Manager based on execution and client management capabilities.

SKILLS

Project Management
Multi-stakeholder coordination, Teamwork, Technical onboarding, Communication, SDLC planning, Process mapping, Cross-functional leadership, Problem-solving

Technical
Cloud infrastructure, AWS, GCP, APIs, AI systems, Systems reliability, Data pipelines

Tools & Platforms
Jira, Confluence, Grafana, GitHub, Python, SQL, Open-source tooling, Documentation systems, Google Analytics, Google G-Suite

PUBLICATIONS
